

Q1. What is the value of the following equation after rounding them off to the nearest tens place?

$$846 \times 131$$

- A. 105100
- B. 110005
- C. 10015
- D. 110500

Q2. What is the value of the following equation after rounding them off to the nearest hundreds place?

$$553 \times 726$$

- A. 2400
- B. 420000
- C. 400200
- D. 420

Q3. What is the value of the following equation after rounding them off to the nearest hundreds place?

$$513 \times 506$$

- A. 250000
- B. 520
- C. 502
- D. 20050

Q4. What is the value of the following equation after rounding them off to the nearest tens place?

$$772 \times 441$$

- A. 338800
- B. 830038
- C. 803308
- D. 838030

Q5. What is the value of the following equation after rounding them off to the nearest tens place?

$$822 \times 851$$

- A. 790006
- B. 690700
- C. 697000
- D. 679000

Q6. What is the value of the following equation after rounding them off to the nearest tens place?

$$271 \times 321$$

- A. 4068
- B. 6408
- C. 86400
- D. 684

Q7. What is the value of the following equation after rounding them off to the nearest tens place?

$$733 \times 841$$

- A. 613200
- B. 603201

C. 306012

D. 302601

Q8. What is the value of the following equation after rounding them off to the nearest hundreds place?

$$577 \times 188$$

A. 20010

B. 21

C. 120000

D. 210000

Q9. What is the value of the following equation after rounding them off to the nearest hundreds place?

$$127 \times 578$$

A. 60

B. 600

C. 6000

D. 60000

Q10. What is the value of the following equation after rounding them off to the nearest tens place?

$$881 \times 915$$

A. 869

B. 809600

C. 806009

D. 609800
