

Q1. What is the value of the following equation after rounding each number to the nearest hundreds place?
 $7476 - 1291$

- A. 62
- B. 6200
- C. 206
- D. 2006

Q2. What is the value of the following equation after rounding each number to the nearest hundreds place?
 $6693 - 3099$

- A. 3600
- B. 360
- C. 3060
- D. 5609

Q3. What is the value of the following equation after rounding each number to the nearest hundreds place?
 $4189 + 3203$

- A. 7400
- B. 470
- C. 407
- D. 4007

Q4. What is the value of the following equation after rounding each number to the nearest hundreds place?

$$2034 - 1282$$

- A. 700
- B. 561
- C. 70
- D. 113

Q5. What is the value of the following equation after rounding each number to the nearest hundreds place?

$$5786 - 3783$$

- A. 20
- B. 2000
- C. 9466
- D. 5224

Q6. What is the value of the following equation after rounding each number to the nearest tens place?

$$2643 + 1894$$

- A. 4350
- B. 3405
- C. 4530
- D. 4053

Q7. What is the value of the following equation after rounding each number to the nearest hundreds place?

$$4597 + 2511$$

- A. 710
- B. 1700

C. 701

D. 7100

Q8. What is the value of the following equation after rounding each number to the nearest hundreds place?

$$1588 - 1270$$

A. 568

B. 300

C. 431

D. 3

Q9. What is the value of the following equation after rounding each number to the nearest tens place?

$$8908 + 7851$$

A. 7661

B. 1667

C. 16760

D. 66710

Q10. What is the value of the following equation after rounding each number to the nearest hundreds place?

$$7540 - 5871$$

A. 6010

B. 106

C. 1060

D. 1600
